Open an Impact CD to create a better world

We're excited about the promise of solar power and other alternative energies. We're passionate about reducing pesticide use. And we're committed to supporting nonprofits' sustainability work. We know many of our customers feel the same way, and that's why we created the Impact CD.

To us, banking isn't just a service—it's a way to create a better world.

An Impact CD supports loans to New Resource clients in one of three key sustainability-related sectors: alternative energy, organic foods and products or nonprofit organizations. You choose!

Impact CD details

- \$2,500 minimum opening balance
- Terms from one month to five years
- Fixed rates
- No maintenance fees
- Early withdrawal penalties
- Choose your impact area when you open the CD

Business & nonprofit banking

New Resource Bank provides loans and lines of credit to support your organization's growth and sustainability efforts. New Resource bankers are experts in clean energy, green building, organic foods and natural products industries as well as nonprofit organizations. We provide businesses and nonprofits with our market knowledge, expert advice and key connections to enable them to succeed. We offer the following services:

- Online banking and bill pay
- Online statements, reporting and management
- Remote deposit capture
- Payment and collections
- Cash sweep (AAA rated, not FDIC insured)
- Certificate of Deposit Account Registry Service (CDARS)
- Commercial lines of credit and term loans
- Small-business lines of credit and term loans
- Real estate and project term loans
- Commercial solar project financing
- Equipment loans

Through a deposit at New Resource Bank, you have the satisfaction of knowing that your money is working to support a more sustainable community.

New Resource Bank is *the* bank for people and businesses who are leading the way to a more sustainable world. Our mission is to advance sustainability with everything we do—the loans we make, the way we operate and our commitment to putting deposits to work for good through a triple bottom line approach to achieving environmental and social as well as financial returns.
